

CASE STUDY

Durable Medium — PKO Bank Polski

SCOPE

Trudatum's Durable Medium project in PKO enables the **publication of bank documents, including regulations and tariffs of fees and commissions in the Hyperledger Fabric network**. All documents are available for customers in the Bank Portal integrated via ESB with the Trudatum platform. The successful integration of Coinfirm's Trudatum within PKO Bank Polski stands as one of the largest blockchain solution integrations in banking in the world.

CASE STUDY

PKO Bank Polski durable medium

ABOUT THE CLIENT

PKO Bank Polski is the largest bank in Poland, founded in 1919. It is also one of the leading financial groups in the CEE region. It **provides its services to about 10mln customers** - both to individual and business clients. PKO Bank Polski is one of the best recognized and most valuable brands in Central Europe.

OUR CHALLENGES

1. Deployment of Trudatum with functions to publish documents in **Hyperledger Fabric** network
2. **Integration of Trudatum Platform** with bank enterprise service bus
3. **Integration with a Third Trusted Party** to store documents outside PKO jurisdiction

BENEFITS

1. **Saving documents** important for customers in an **immutable way** (tariffs, regulations, etc)
2. **Ensure compliance** with durable medium regulations
3. **Reduce costs** of sending documents by traditional means
